PROFESSIONAL EXPERIENCE

Freelance Software Developer | Remote | Dec 2025 – Present

- Engaged with clients and stakeholders to understand business objectives, workflows, user requirements and technical needs.
- Conducted requirements discovery and translated customer needs into practical solution approaches and implementation plans.
- Designed web solutions using JavaScript, TypeScript, React, Next.js, REST APIs, authentication and third-party integrations.
- Demonstrated solutions to technical and non-technical stakeholders, explaining functionality, workflows, benefits and trade-offs.
- Integrated and tested third-party services; troubleshoot authentication, configuration, deployment and integration issues.
- Worked with PostgreSQL/MySQL and Prisma; applied Docker, Linux and CI/CD concepts to delivery workflows.

Software Developer | Excelz Ghana | May 2025 – November 2025

- Translated business and operational requirements into functional technical solutions while collaborating with stakeholders.
- Troubleshoot application and integration issues and communicated solution options clearly.
- Supported solution demonstrations and technical explanations; developed web applications, integrated APIs and tested functionality.
- Applied Git-based workflows and supported deployment/environment configuration.

Software Engineering Programme | ALX Africa | March 2024 – November 2024

- Built practical experience translating requirements into solutions involving REST APIs, authentication, validation and third-party integrations.
- Applied testing, debugging, root-cause analysis, documentation and demonstrations in collaborative delivery environments.

SELECTED TECHNICAL PROJECTS

Recipe Finder — API-driven recipe discovery solution

- Integrated real external APIs to solve recipe discovery and information usability needs.
- Containerized the React/Vite application with a multi-stage Docker build: Node Alpine build stage → lightweight Nginx production runtime.
- Built/tested on Linux/Ubuntu and pushed the production image to Amazon ECR as part of an AWS deployment workflow.
- Documented and demonstrated architecture, deployment flow and technical trade-offs.

AI Travel Assistant — AI-powered travel solution

- Built a travel solution recommending flights, hotels and trips based on budget and preferences; integrated an API proxy and payment functionality.
- Applied REST API integration, troubleshooting and user-focused solution design; deployed the frontend to Vercel for demonstrations.
